

# Amiga KickSmash 32 - In-system smart flash EEPROM

Rev 7 2025-03-12

TITLE: STM32		REV: 7.1
EasyEDA	Company: eebugs.com	Sheet: 1/4
	Date: 2025-03-13	Drawn By: cdhooper

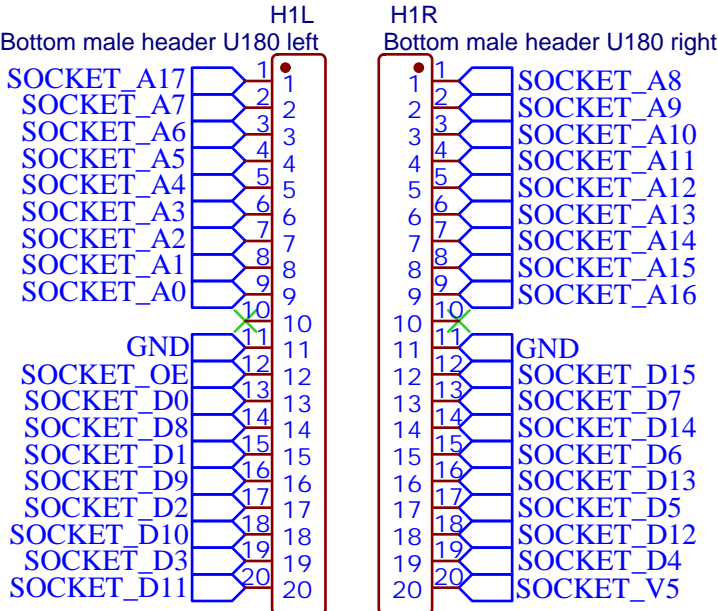

If using Yellow or Green LED here, use 3.3K - 5.1K resistor.

STM32 can override these

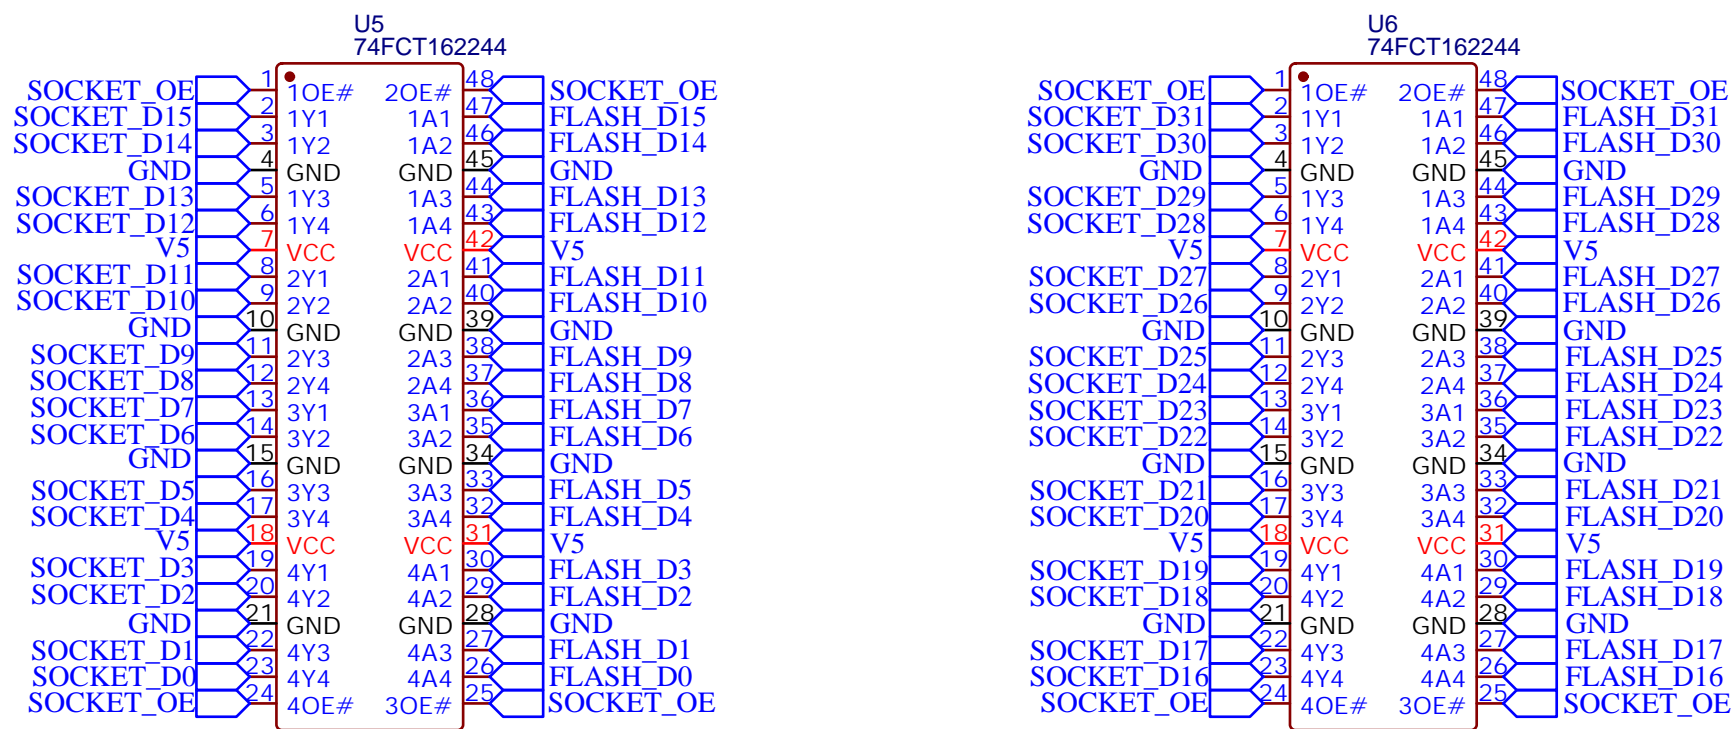

A3000/A4000

A3000 U182/U183  
ROM Tower

Bus drivers are used to decouple STM32 putting response and flash write data on the bus from when the Amiga CPU does a read.

When FLASH\_OEWE is high, FLASH\_WE will be driven low when SOCKET\_OE is low. Otherwise, FLASH\_WE is managed by the STM32. This will allow the Amiga CPU to terminate a flash command write at the end of a bus cycle.
