

Amiga KickSmash 32 - In-system smart flash EEPROM

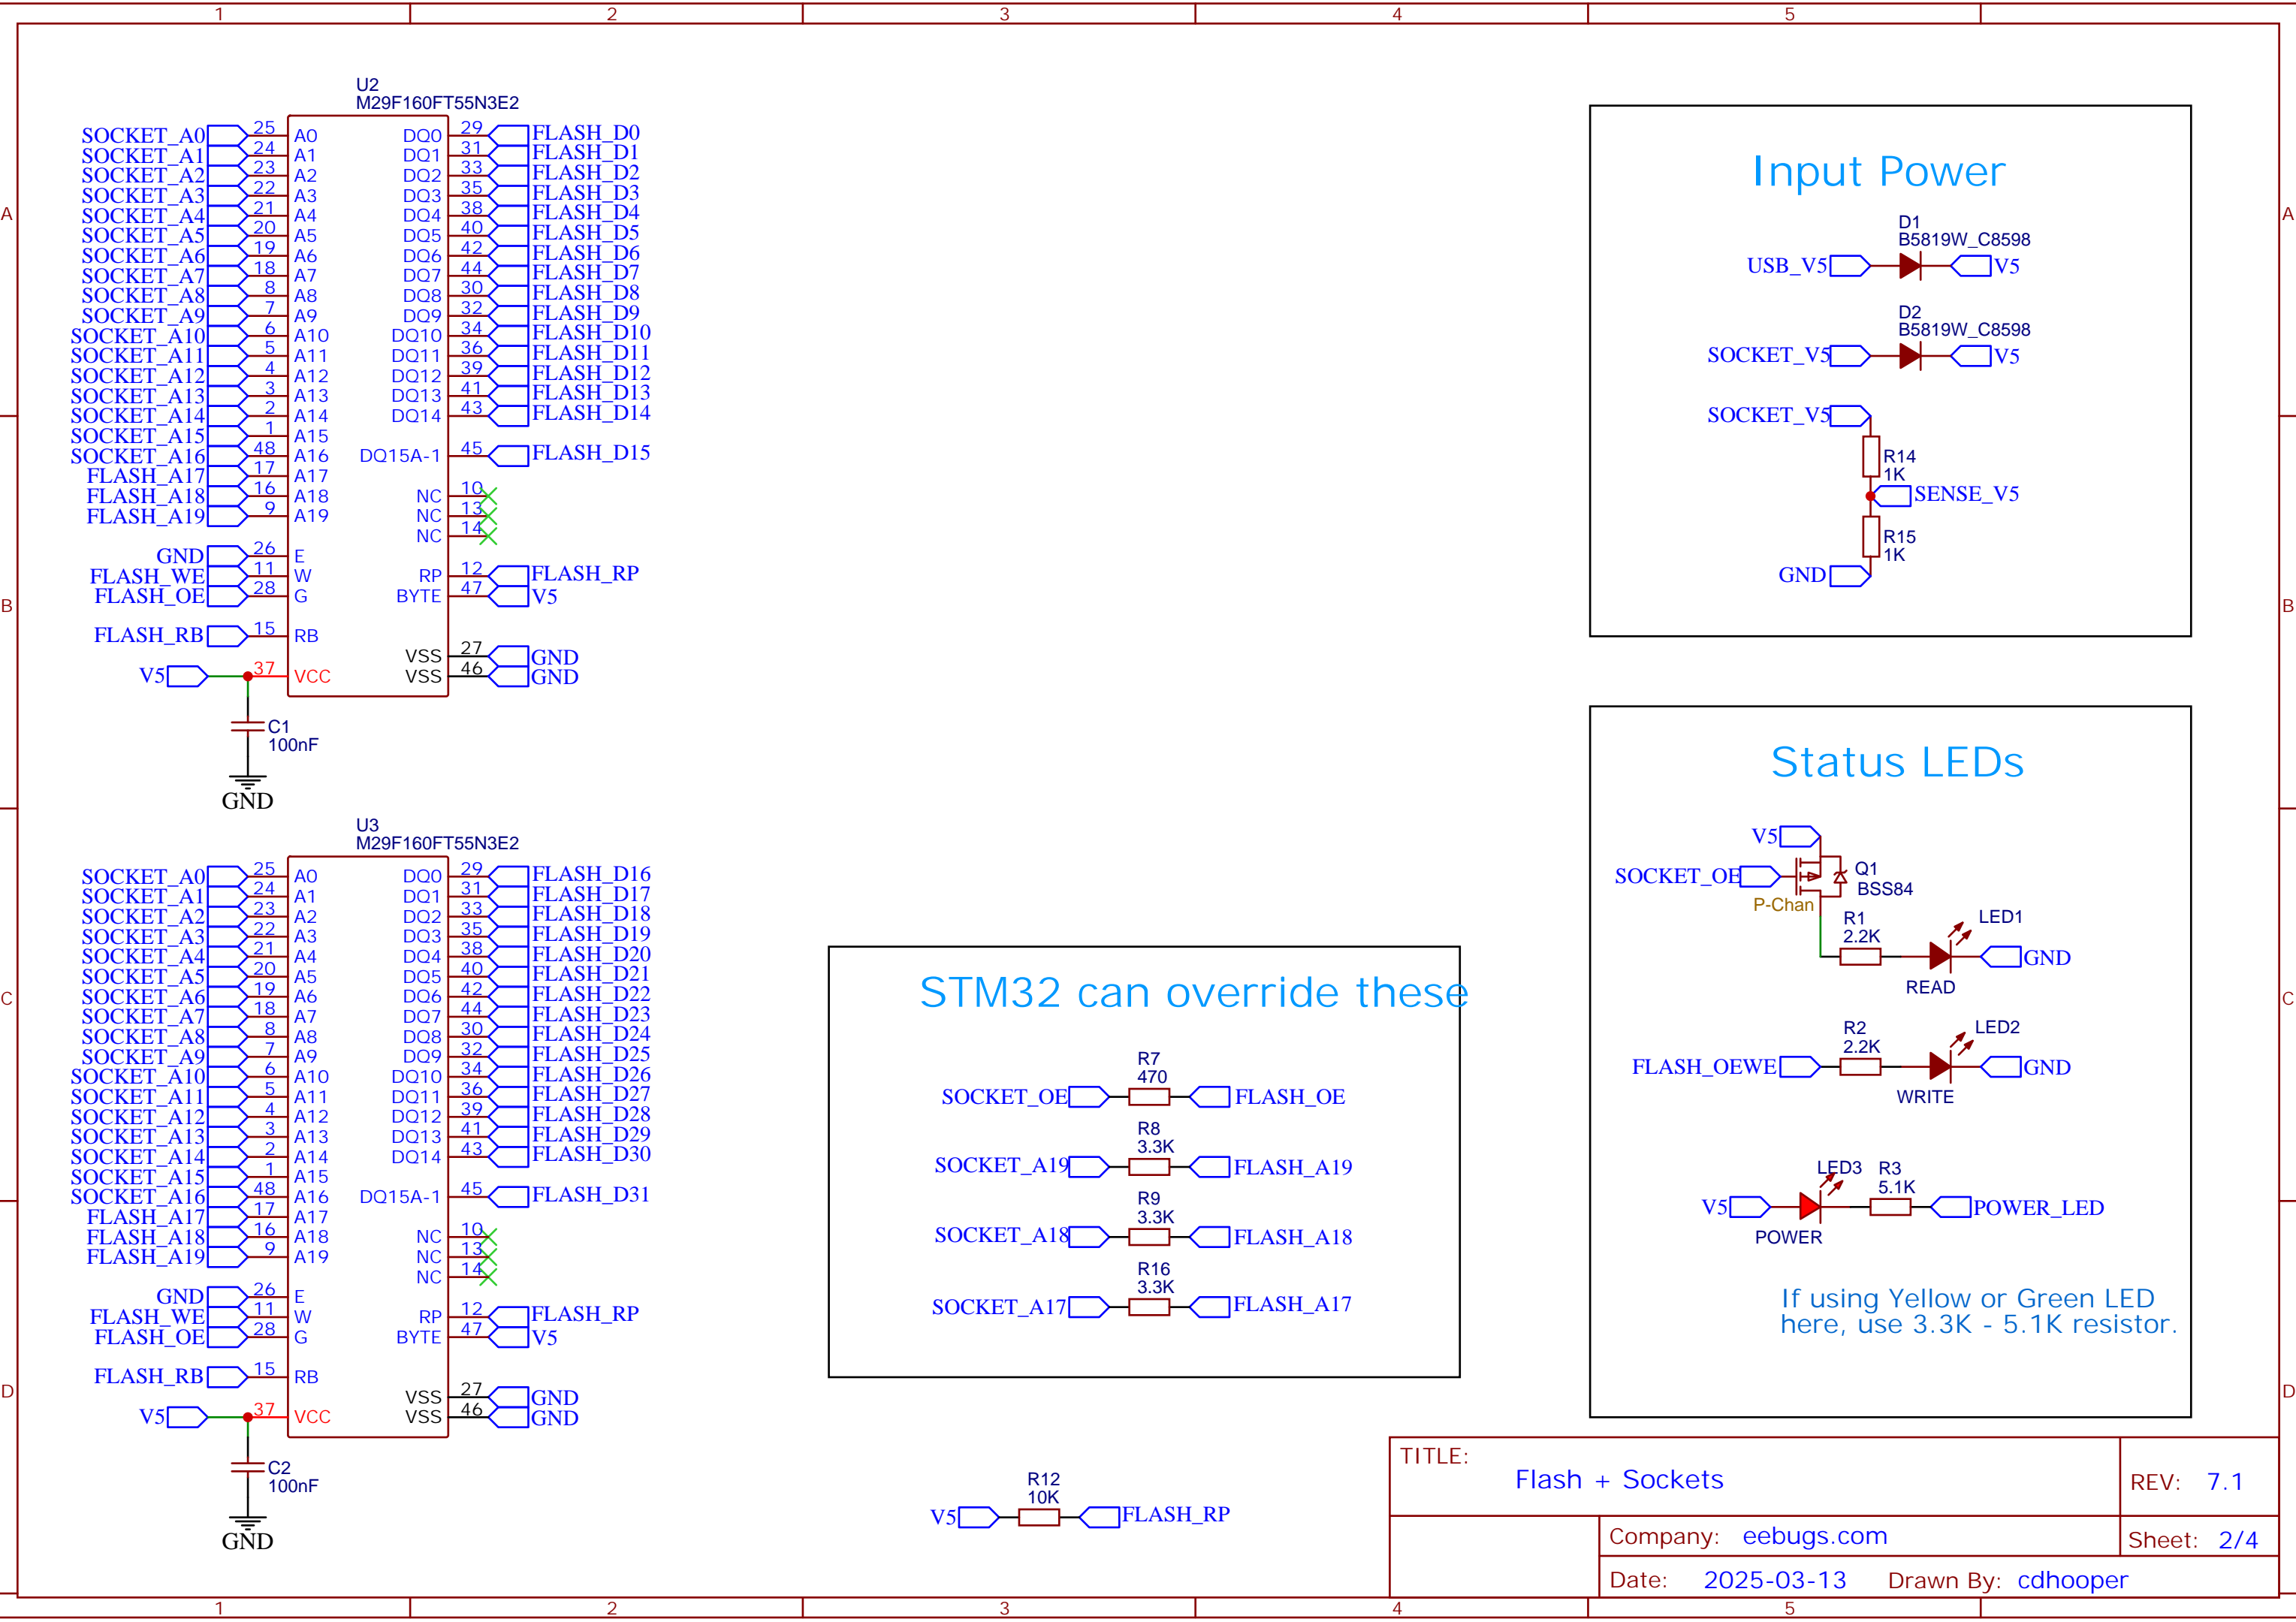

Rev 7 2025-03-12

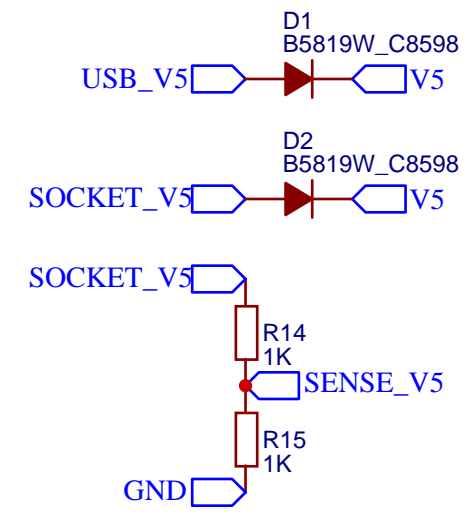

Capture Amiga reset

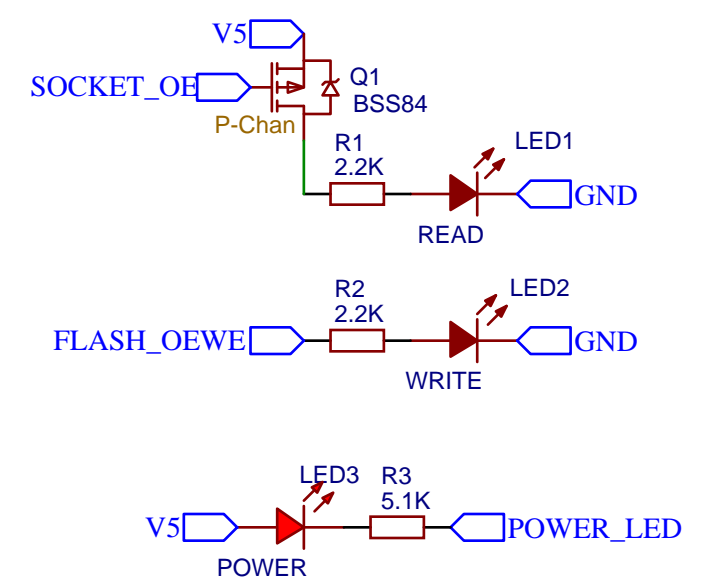

TITLE: STM32		REV: 7.1

	Date: 2025-03-13 Drawn By: cdhooper	

Input Power

Status LEDs

If using Yellow or Green LED here, use 3.3K - 5.1K resistor.

STM32 can override these

Bus drivers are used to decouple STM32 putting response and flash write data on the bus from when the Amiga CPU does a read.

When FLASH_OEWE is high, FLASH_WE will be driven low when SOCKET_OE is low. Otherwise, FLASH_WE is managed by the STM32. This will allow the Amiga CPU to terminate a flash command write at the end of a bus cycle.
